
MIDNIGHT SYNDICATE

Vampyre

Symphonies from the Crypt

Unleash your darkest nightmares as you enter the world of the Vampyre. Echoing from ancient crypts, these haunting symphonies call forth the horror, mystery, and passion of the night that awaits you . . .

In 1998, composers Edward Douglas and Gavin Goszka released *Born of the Night*, a unique CD of gothic/horror symphonic instrumentals that pushed the boundaries of the gothic and classical crossover genres. Four years and three albums later, Midnight Syndicate has established itself as a musical force selling over 115,000 units to a dedicated and growing group of gothic, horror film/music, and Halloween aficionados worldwide.

The ability to cross genres has been a great advantage for the group. In 2000, heavy metal artist *King Diamond* used the CDs as exclusive pre-show music for his tour. Locally, the band has been voted *Best Gothic Act* for two consecutive years by the *Cleveland Free Times*. In theater and film, the music is featured in several *Full Moon Pictures* horror features, a short film starring *Alice Cooper*, and won an award for *Best Music* at New York's 2001 *Spotlight On Theatre Awards*.

Halloween has always been the band's time to shine and, for much of America, Midnight Syndicate's music has become an integral part of the season. The most commonly used CDs in the Haunted Attraction industry, each year the music is featured in hundreds of attractions across North America, including *Universal Studios Florida, Sea World, Paramount Parks, Busch Gardens*, and several *Six Flags* parks. In addition to being used on the *Today Show* and *Monday Night Football*, Midnight Syndicate dominated MP3.com last Halloween, with all six of their singles holding Top 20 positions (including #1 and #2) for over a week.

Since it's inception, Midnight Syndicate's goal has been to create music that stimulates listeners' imaginations, transporting them to worlds and movies of their own creation. Set in the catacombs beneath an ancient graveyard and featuring some of the band's most complex arrangements and production to date, *Vampyre: Symphonies from the Crypt* promises to do just that.

MIDNIGHT SYNDICATE IS EDWARD DOUGLAS AND GAVIN GOSZKA
